

HACKDEMONIUM

SPONSORSHIP PROSPECTUS

HACKDEMONIUM.ORG
501(C)(3) NON-PROFIT ORGANIZATION

Mission Statement

Empower students to explore the many aspects of computer science and inspire them to create change through code.

Vision Statement

Create interest in the STEM field from an early age to inspire ideas that will change the world.

What is Hackdemonium and who are we?

We are a group of high school students based in Washington that want to provide opportunities in the computer science field to middle and high school students internationally. We believe in solving problems through code to make real change. Our event is all-inclusive and believes in inspiring students through computer science. We believe in giving the next generation many opportunities to discover the STEM field. Our hackathon is create to inspire and motivate students to solve problems through code.

Why did we found Hackdemonium?

We have noticed that there is a lack of opportunities in the CS field that are available for younger people. Having done a couple of hackathons ourselves, we understand the great potential of them to give organizers and sponsors the opportunity to promote computer science. The future of our world is based in computer science and we want to ignite an interest in the next generation.

Why sponsor us?

We will promote your brand to the 200+ participants that will be the future of the workforce. Inspire them with your products and services, and show them that there's space for innovation in the STEM field. You will also get the opportunity to send mentors, sponsor prizes, and present your product/services. We also will promote your brand on our websites and social media giving your brand more recognition.

How will your money/products be used?

Your sponsorship will make Hackdemonium a better event! We'll provide more resources and prizes for our participants. By giving our participants a free trial of your product they will have the chance to try it out for free and will continue using the product if they enjoy it. We can also set up a workshop that introduces the participants to your product.

How can you contribute?

- Sponsor prizes and award the winner a subscription/copy of your product to show support for the event
- Send representatives as mentors to help participants with their projects throughout the hackathon
- Have a representative judge projects
 - Host a panel or workshop to share information about your product or your industry
- Provide free tools and resources for participants to use
